

Elevate and Empower your Business

with the Colour Laser Range

Empower your business, elevate eco-consciousness

Brother's colour laser printer range is designed with both usability and sustainability in mind. Featuring an ergonomic design, easily replaceable components, and rich colour output, ensuring your business enjoys a hassle-free, high-quality printing experience.

Designed with the environment in mind

As sustainability becomes a business imperative, more companies are adopting eco-conscious hardware. This range is designed to extend product life, reduce downtime with replaceable components and easy to recycle EPS-free packaging. Engineered to reduce our environmental impact, every model in the range contains recycled plastics, consumes up to 31% less energy and produces lower CO2 emissions compared to previous models.

Engineered for maximum efficiency

High-speed printing and scanning: with scan speeds of up to 100 images per minute and 34% faster first print out time than previous models, our latest device delivers best-in-class scanning efficiency to support modern business workflows.

Effortless setup: automatically detect and connect to your Wi-Fi network, saving you and your business time by eliminating the need for manual input.

Built-in Eco Mode feature: The eco mode feature adjusts fuser temperature and enables power scheduling, conserving energy and helping your business meet its sustainability goals.

Compact and powerful: Designed for modern workspaces, this range features a streamlined footprint that fits easily into most spaces without compromising on performance.

Solutions ready

Enhance efficiency and protect sensitive information with integrated print management solutions. Brother offers a suite of device management, security and workflow solutions which can be added to devices. Helping you streamline operations and safeguard your business.

Brother solutions are designed to scale with your organisation. Whether you're managing a small fleet or a complex multi-site environment, devices are built to integrate smoothly into existing systems while remaining easy for users to operate day to day.

This approach reduces friction at the device, supports IT governance, and helps future-proof your print environment as requirements change.

Custom UI and print management compatibility

Brother devices support a more intuitive and controlled user experience through Custom UI and compatibility with leading print management software.

Custom UI allows you to personalise the touchscreen interface, simplifying menus and presenting only the functions users need. This helps reduce errors, speed up interactions, and create a consistent experience across shared devices.

At the same time, devices are designed to integrate with third-party print management software. This enables organisations to apply existing print policies, reporting, and access controls without changing infrastructure or retraining users.

Secure by design

To keep pace with the ever-evolving legislation on privacy and data security, our devices offer the latest industry-standard security features to securely protect your data.

At Brother we put print security first. All our products are 'secure as standard' using triple-layer security at a network, device and document level, with a range of robust features that means data is only ever seen by those it is meant for.

With businesses shifting towards zero trust environments, we know that security is your highest priority. The range offers enhanced data protection, backed by external security certification for added peace of mind. Every device includes a flexible suite of security features tailored to your business, making it easy to audit, control and manage your fleet.

Security solutions

Secure Print+

Print confidential documents securely with Brother's Secure Print+. Your sensitive documents are only printed when you are ready to collect them using a Near-field Communications enabled ID card. Only authorised staff can collect their documents and users are easily added and removed.

Secure Print Advanced

It's common in an office to pick-up a printed document and find multiple documents left on a printer, increasing the potential of information getting into the wrong hands. The use of pull printing adds an additional level of protection to your documents.

*Secure Print+ and Secure Print Advanced require additional licencing. Please contact Brother or speak with your account manager for more information.

Simplify your printing with Brother's Managed Print Services

Selected models in this range are available as part of a Managed Print Service (MPS) contract. Each eligible device is designed with MPS in mind, supporting simpler printer management, predictable costs and reliable day-to-day performance. Whatever your printing needs, we'll be at your side to help reduce admin, save time and keep your business productive.

Benefits of MPS

- **Proactive consumable replenishment**, with toner, ink and drums supplied automatically before you run out.
- **Preconfigured delivery and professional installation**, with devices set up, tested and ready to use with minimal disruption.
- **Nationwide break-fix support and maintenance**, all included at no additional cost
- **Easy consumable recycling**, with recycling boxes collected through our nationwide programme to support your sustainability goals.
- **Ongoing optimisation and account management** to ensure your print environment continues to meet your needs.
- **Print usage monitoring and service management**, overseen by a dedicated team to keep your environment running smoothly.
- **Access to trained local service specialists**, supported by our 24/7 New Zealand-based Helpdesk throughout the life of your Managed Print Service.

Playing our part for sustainability

Designed for responsible recycling

Brother New Zealand makes it easy to recycle printers and consumables through simple, responsible pathways that help reduce waste and keep valuable materials in use. From everyday printing to fully managed environments, sustainability is built into the way Brother products are designed, supplied and supported.

Working with our certified e-waste partner, Recycling Group, returned consumables and devices are collected and processed with care, supporting a circular economy and reducing environmental impact across the product lifecycle.

EPS-free recyclable packaging

Our award-winning moulded pulp packaging replaces Expanded Polystyrene (EPS) within our printer packaging. Developed with advanced simulation technology, ensures durability and flexibility for safe product delivery. It uses fewer resources, making it easy to recycle.
