

Adding Registration Marks in FLUX is done in FLUX Signatures. These Finishing Marks can also be saved for repeat use.

- Open AccurioPRO Flux and setup the appropriate Imposition template for your job.
- Select Signature and pencil to edit.
   Name NEW signature if you want to save the Signature Template.
- 3. Select **Register marks**.
- Select the **Type** and define the parameters, size, alignment and apply to front sides / back sides or both.
- 5. **Apply** the Settings to the Signature.
- NOTE: Saving this selection will create Register Mark 1... 2 etc.
- You may Load **Register Mark 1** again if this is a Register mark style you want to use again.
