

How to create multiple offset note pads with a single file and insert slip sheets in between.

1. Open 'Note pad' file in FLUX
2. Select Finishing / Additional Printer Settings
3. Go to the Output tab
4. Enter quantity of 'Pages' in each pad
5. Consider whether you want the output face-up
6. Load the Note pad media in the tray and a slip sheet media for separation sheets in a separate tray.
7. Go to Controller
8. Go to Common Settings
9. Choose 'Offset Output Mode'
10. Select 'Change Output Pos' + 'Partition paper'
11. Select the tray the slip sheets are loaded in.

Print the total job and in this example you will produce 50 x A4 sheets separated by a yellow slip sheet every 50 sheets until you reach the total number of 500 printed sheets.
